PRODUCT PROPOSAL

More than a casino list

Adding football data, odds and practical tools to the white label, built around what people already search for every week.

Date	For	Status
October 2026	**Product Owner**	**Draft for discussion**

SUMMARY

The idea in one page

Most affiliate sites in Portugal look the same: a ranked list of casinos, a bonus table and articles written to rank. They get visits from Google, but they give people very little reason to come back.

We want to add the things a football fan or a bettor looks up every week anyway: when the game is, which channel shows it, how the teams have been playing and which bookmaker has the best price. At Stakely we already work with this kind of data every day, so the hardest part is solved.

Promoting licensed operators stays. The difference is that it sits next to something useful instead of being the whole page. People who find what they need come back, and people who come back are the ones who eventually sign up with a bookmaker or casino through us.

Search is still our main source of traffic. Every feature in this document was picked because it answers searches that real people make, and most of them are searches the usual affiliate sites ignore.

What we need from you

1. **Agree on the positioning:** useful data and tools first, promotion second.
2. **Approve Phase 1:** TV guide, match pages, league tables and odds comparison.
3. **Choose the competitions for launch.** Our suggestion: Liga Portugal, Liga 2, Taça de Portugal, the five big European leagues and the UEFA competitions.

POSITIONING

Where we fit

zerozero has the data but no betting angle. Affiliate sites have the betting angle but almost no data. Sofascore and Flashscore own live scores. The space we can take is in between.

	ZEROZERO	SOFASCORE, FLASHSCORE	TYPICAL AFFILIATE	OUR SITE
Fixtures, results, league tables	Yes	Yes	Rarely	Yes
Stats that help with a bet (goals, corners, cards)	Some, hard to find	Some	No	Yes, easy to find
Where to watch on TV	Yes	Partly	No	Yes
Odds compared across licensed bookmakers	No	Limited	Rarely	Yes
Casino and bonus reviews	No	No	Yes	Yes
Live scores	Yes	The best	No	Basic

We should not try to beat Sofascore on live scores. It is expensive, and they will always be faster. Our match pages should be strongest before and after the game.

SEARCH DEMAND

What people are looking for

THEY SEARCH	THEY WANT	WE SHOW
jogos na tv hoje, onde ver o benfica	Time and channel, quickly	A daily TV guide with every game, channel and kickoff time
benfica vs porto	Preview and odds, later the result	One page for the game that updates from preview to final score
onzes sporting	Confirmed lineups before kickoff	Lineups on the match page as soon as they are announced
classificação liga portugal	The table and the next round	League page with table, fixtures and top scorers
equipas com mais cantos	A ranked list	Stats rankings for each league
odds aumentadas hoje	Today's boosted prices	A daily list of boosts from licensed bookmakers
árbitro do clássico	Who referees and how strict they are	A referee page with cards and penalties per game

FEATURES

What we could build

Each feature has a suggested phase. Phase 1 is what we would launch first; the rest follows once Phase 1 is bringing in traffic. Each one is also marked with where its data comes from.

● **Football feed** ready from our data provider ○ **Built by us** we calculate or make it ● **Other source** needs data from elsewhere

Football

GAMES, TEAMS AND PEOPLE

TV guide

Phase 1

● Other source

Every game shown on Portuguese TV today and this week, with channel and kickoff time. Filter by team, competition or channel.

Why it matters: one of the most common football searches in Portugal, made every single day. Each game in the list links to its match page, where the odds are.

Match pages

Phase 1

● Football feed

One page per game that changes as the game gets closer. A week before: form, head to head, injuries, TV channel and odds. About half an hour before kickoff: confirmed lineups. After the final whistle: result, stats and which common bets won (total goals, both teams to score, corners).

Why it matters: everything about a game in one place. The page keeps the same address all week, so it gains ranking instead of starting from zero, and the best-odds buttons lead to licensed bookmakers.

Leagues

Phase 1

● Football feed

Table, fixtures, results and top scorers, plus stats rankings: which teams score most, concede most, win most corners and get most cards, at home and away.

Why it matters: tables get checked after every round, and stats rankings in Portuguese are hard to find.

Teams

Phase 2

● Football feed

Next game, recent form, squad and stats. A button adds all of the team's fixtures to your phone calendar, and they stay up to date.

Why it matters: fans search for their club constantly. The calendar keeps us on their phone for the whole season.

Players

Phase 2

● Football feed

Goals, assists, shots, cards, minutes played and injury status, with the odds for that player to score in their next game.

Referees

Phase 2

○ Built by us

Cards and penalties per game, and the games they have been appointed to. There is no ready-made referee data, so we build these pages from the match records.

Why it matters: people betting on cards look for this, and almost nobody publishes it. Easy to rank for.

Transfers

Phase 2

● Football feed

Every signing and departure for each club, with dates and fees where known.

Why it matters: searches like "transferências benfica" jump every summer and every January.

Coaches

Phase 3

● Football feed

Career, clubs and trophies for each manager, linked from their current team.

Stadiums

Phase 3

● Football feed

Capacity, city, photo and the next games played there.

Why it matters: people look up the ground before travelling to a game, and each stadium page links to its upcoming matches.

Odds and offers

LICENSED BOOKMAKERS ONLY

Odds comparison

Phase 1

● Other source

The best price for each bet across bookmakers licensed by SRIJ, clearly marked. Shown on match pages and on a daily "best odds today" page.

Data note: our football data provider covers very few bookmakers licensed in Portugal. At first, prices would come from the odds feeds bookmakers offer their affiliates, and later from Stakely.

Boosted odds today

Phase 2

● Other source

A daily list of the boosted prices bookmakers run on big games, in one place.

Why it matters: a search people repeat every weekend, and every item on the list is a reason to click through to a bookmaker.

Offers by game

Phase 2

● Other source

Promotions tied to a specific game, such as a free bet for the derby, shown on that game's page and linked to our bonus pages.

Price movement

Phase 3

○ Built by us

How the odds for a game moved since they opened. Experienced bettors use this a lot. We would save the prices every few hours to build the history ourselves.

Tools

PAGES PEOPLE BOOKMARK AND SHARE

Calculators

Phase 2

Built by us

Odds converter, accumulator returns, bookmaker margin, and a bonus wagering calculator that shows what a casino bonus really costs to unlock before you can withdraw.

Why it matters: tools get bookmarked and linked by other sites. The wagering calculator leads straight into our bonus pages and is honest with the user at the same time.

Responsible gambling

Phase 3

Built by us

A monthly budget planner, a short self-check quiz and a step-by-step guide to self-exclusion with SRIJ.

Why it matters: it protects users, and Google looks for this on gambling sites when deciding who to trust.

Casino data

BUILDS ON THE SLOTS WE ALREADY HAVE

Slot lists

Phase 2

Built by us

Highest return to player, most volatile, bonus buy, biggest maximum win and the newest releases each month.

Licence check

Phase 2

Other source

Is a given site licensed in Portugal? For unlicensed names, the page says so plainly and lists licensed options.

Why it matters: lots of people search the names of unlicensed sites. Answering honestly sends them somewhere safe and legal.

Slot return in Portugal

Phase 3

Other source

Many slots exist in several versions that pay back different amounts. We show which version is used in Portugal. Players rarely know this.

Withdrawal times

Phase 3

Built by us

How long each casino really takes to pay out, by method (MB Way, Multibanco, bank transfer), tested by us.

Why it matters: our own data, which nobody can copy, and the best evidence that our rankings are real.

Market reports

Phase 3

Other source

Quarterly charts and short commentary based on the official SRIJ figures for the Portuguese market.

Why it matters: journalists and other sites cite this kind of material, which helps our search ranking without us becoming a news site.

Bringing people back

LOYALTY

Favourite team

Phase 3

Built by us

Pick a team once and the home page shows its next game alongside today's matches. No account needed.

Alerts

Phase 3

Built by us

"Your team kicks off in an hour", "lineups are out", and a short weekly email with fixtures and the best offers.

Boxes for other sites

Phase 3

Built by us

A league table or fixtures box that fan blogs can add to their own pages, with a link back to us.

Lottery results

Phase 4

Other source

Euromilhões, Totoloto, EuroDreams and M1lhão results and history. Very high search volume and cheap to build, though it brings visits more than revenue.

QUALITY

Rules for automatic pages

Pages built from data only work if each one has something real on it. Google penalises sites that publish thousands of near-empty pages, and users notice them too. We would follow these rules from day one.

1. **A game gets a page only if it is in a competition we cover** and the page has TV information or odds.
2. **Players and referees get a page once they have enough games** for the numbers to mean something.
3. **The text comes from the data.** "Unbeaten in nine home games" is useful. The same sentence with the names swapped is not.
4. **Every page links to the pages around it:** league to team, team to game, game to referee and odds.
5. **Only licensed operators are shown or linked,** on every page, without exception.

ROADMAP

Four phases

PHASE 1

Foundation

- TV guide
- Match pages, before and after the game
- League tables and stats
- Odds comparison

Daily visits and the first revenue from sports.

PHASE 2

Depth

- Teams, players, referees
- Transfers
- Boosted odds, offers by game
- Calculators
- Slot lists, licence check

Cover the many smaller searches around each game.

PHASE 3

Loyalty and trust

- Favourite team, alerts
- Coaches and stadiums
- Boxes for other sites
- Withdrawal tests, slot return
- Market reports, price movement
- Responsible gambling tools

People come back on their own, and other sites link to us.

PHASE 4

Expansion

- Lottery results
- Richer live coverage
- Basketball and tennis
- Other countries of the white label

Grow once the first phases have proven themselves.

BEFORE WE START

Risks, decisions and measures

Risks

Data rights

We need to confirm our football data plan allows commercial use at the volume we need.

Bookmaker coverage

Our football data provider has few bookmakers licensed in Portugal. Odds would start from affiliate feeds, which means agreements with each bookmaker.

Club crests

Crests are trademarks. We may have to show names and club colours instead.

Advertising rules

Odds shown next to bookmaker buttons must follow SRIJ rules on gambling advertising. Needs a legal review before launch.

TV listings

Our football data provider has no TV information, and there is no clean public source for Portuguese channels. Someone has to maintain it, or we find a partner.

Live scores

Costly, and others do it better. We propose keeping them minimal.

Decisions for you

Competitions at launch

Which leagues we cover first. This sets both the cost of data and the size of the site.

Who owns the TV guide

An editor on our side, a partner, or both.

One brand or two

Sports and casino under the same brand, or a separate sports site that links to it.

Data budget

Monthly cost for the football data plan and odds feeds at the coverage we choose.

How we will know it works

Returning visitors

The share of people who come back within a week.

Clicks to bookmakers from match pages

Whether useful pages also earn money.

Weekly visits to the TV guide and match pages

Whether the daily habit is forming.

Pages Google actually shows

The share of our pages that appear in search, a sign of quality.

Links from other sites

Earned by tools, boxes for other sites and reports.

Sign-ups per visitor

Compared with today's casino-only pages.
